MEET OUR EXPERT STAFF

Elaine Hill has been the Sundries Manager at Highfield for 11 years and during that time she has seen her department grow from just a few shelves of gardening essentials to an extensively stocked gardening area.

Elaine is always ready to give help and information to new and regular customers alike and stocks a wide range of products from fertilisers, pesticides and herbicides to propagation, bulbs and seeds. There is plenty to choose from in gardening wear, garden gifts, gardening essentials and tools and her birdcare range should cater for all your feathered friends.

Elaine has kept up to date with the many changes in chemical products and their uses and increases her knowledge by attending various seminars. She is constantly looking for new gardening products so if you have any fresh ideas or require something not stocked she is always ready to listen.

James Woodyatt, Highfield's Pet Shop Manager, has had an interest in pets since the age of 5 when he had his first hamster. He progressed from there to keeping tropical fish and his interest for more exotic animals was born when he lived abroad as a child and looked after rescued tortoises and turtles at school, as well as many birds of prey including Griffins, Vultures, Red Kytes and Honey Buzzards.

For his 10th birthday, James received a cornsnake and from there his reptile collection quickly grew to include over 100 snakes, 20 lizards, 4 tortoises, tarantulas and scorpions! He also kept African Pygmy Hedgehogs, Armadillos, 4 aviaries of Grassland Parakeets, 2 large Koi ponds and a large flock of pure breed poultry.

James carried his childhood interest into his work life and studied at Hartpury College where he gained many qualifications in Animal Care & Management before working in a variety of Pet, Aquatic and Reptile shops as well as with Landscape & Garden Buildings, Hot Tubs & Spas. His knowledge in all of these areas is superb and he is willing to give advice to anyone from the smallest child buying their first mouse through to those wanting to discuss the more complex matters of getting the balance of chemicals right in their hot tub.
